PROFESSIONAL PROFILE

Senior IT Systems Administrator with 11+ years of experience administering Windows Server environments (2012–2022), virtual server landscapes (VMware ESXi, Citrix CVAD, Azure Virtual Desktop) and Microsoft Office 365 / Azure AD. Proven track record in OS upgrades, in-place migrations, patch lifecycle management, PowerShell automation, Root Cause Analysis (RCA) leadership and technical knowledge-transfer workshops with internal and external IT service providers. Solid understanding of data backup concepts and recovery strategies; currently expanding expertise in Veeam Backup & Replication and Exchange Server on premises. ITIL v4 and Microsoft Azure Administrator certified. Committed to driving technical advancement and serving as a trusted subject-matter expert for system engineering challenges.

TECHNICAL SKILLS

Windows Server	Windows Server 2012 / 2016 / 2019 / 2022, OS upgrades, in-place migration, rollback planning, server hardening, WSUS, DNS, DHCP, File Services, Print Services
Server Migration	Windows Server OS upgrade projects (2016→2019, 2019→2022), scheduled change execution, migration testing, rollback strategies, change documentation
Citrix NetScaler/Dass VDA	VDI & Infrastructure: Citrix CVAD, VMware Horizon, Azure Virtual Desktop, image management (PVS/MCS), FSLogix, host/connection broker troubleshooting
Backup & Data Protection	Veeam Backup & Replication (actively developing), backup concepts, backup verification, recovery testing, RPO/RTO planning, snapshot management
Office 365 & Cloud	Microsoft 365 Admin Center, Exchange Online, Teams administration, SharePoint Online, Intune, OneDrive, licence management, security baselines
Identity & Access	Active Directory (AD DS), Azure AD / Entra ID, hybrid identity, GPO, RBAC, Conditional Access, MFA, SAML, ADFS, DNS, DHCP
Virtualization	VMware ESXi (host management, storage, vSphere fundamentals), Citrix CVAD (Cloud/LTSR), Azure Virtual Desktop, Hyper-V (foundational), PVS/MCS
Scripting & Hardware management	PowerShell (advanced: server configuration, reporting, remediation), Task Scheduler, GPO-based automation, and PIR hardening standards for physical servers. Rack and stack / physical data center operations
Monitoring & Tools	Zabbix, Control Up, Wireshark, Windows Event Viewer, Performance Monitor, SQL backend analysis
ITSM & Processes	ITIL v4, Incident & Change Management, SLA adherence, RCA leadership, technical workshops, runbook creation, external service-provider coordination

PROFESSIONAL EXPERIENCE

IT Senior Consultant – Windows Server & Cloud InfrastructureJun 2022 – Oct 2025

Oracle India Pvt Ltd | Hyderabad, India

- Administered Windows Server infrastructure (2016–2022) for 5,000+ endpoints; planned and executed OS upgrades, in-place migrations and maintenance windows with structured rollback documentation — zero unplanned outages achieved.
- Managed Azure AD / Entra ID hybrid identity, Conditional Access, MFA / SAML / ADFS and device compliance; enforced security baselines across hybrid Windows Server environments.
- Delivered PowerShell automation for server configuration, patch reporting and user management — reducing manual administration effort by approximately 40%.
- Led Root Cause Analysis and fault investigations in collaboration with internal teams and external IT service providers; conducted technical knowledge-transfer workshops and produced runbooks for Tier-1/2 teams — escalation volume reduced by 25%.

- Provided technical advisory on Windows and cloud infrastructure development; maintained 98%+ SLA achievement for P1/P2 incidents across 3 years of on-call support.

Associate Citrix SME – Virtual Server Landscape & Systems Administration
Apr 2021 – Jun 2022

Microland Ltd | Hyderabad, India

- Administered virtual server landscape (Citrix CVAD Delivery Controllers, StoreFront, licensing, PVS/MCS servers) for 2,000+ users; managed server OS updates, image versioning and rollout coordination.
- Delivered server-side configuration optimisation and backup concept support for VDI environments — logon times reduced by approximately 35%. Advised the team on infrastructure improvements and created technical operational documentation.

Senior System Administrator – Windows Server & citrix Infrastructure
Jun 2019 – Apr 2021

Wipro Technologies Pvt. Ltd. | Hyderabad, India

- Administered a Citrix server-based infrastructure supporting 3,500 workstations; structured patch management for Desktop/server hosts; upgrade planning and rollback strategies across 8 release cycles with zero outages.
- Performed fault analysis (log correlation, SQL backend, configuration optimization) in collaboration with external IT service providers; RCA reports reduced infrastructure incidents by 20% per quarter.

Citrix Administrator – Server Virtualization & AD Administration
Jul 2016 – Jun 2019

PrimEra Medical Technologies Pvt Ltd | Hyderabad, India

- Administered Citrix CVAD 7.x LTSR servers, Active Directory, GPO and RBAC for 800+ users; managed scheduled server maintenance windows and change management in accordance with ITSM processes. Supported data backup procedures and coordinated backup verification activities.

Data Centre Operations – VMware ESXi & Server Virtualization
Jul 2015 – Jul 2016

Wipro Infotech | Hyderabad, India

- Administered physical/VMware ESXi hosts, storage optimization and capacity planning; executed controlled infrastructure changes.
- Physical and virtual server lifecycle management — design, deployment, configuration, maintenance and decommissioning of HP, IBM and Cisco UCS hardware
- ESXi installation and host maintenance
- Storage optimization and capacity planning also HA/DRS cluster management
- Remote server administration via iDRAC and ILO interfaces

Windows Server & Desktop Administrator
May 2014 – Jul 2015

Angel Brooking Pvt Ltd | Hyderabad, India

- Provided L1/L2 administration of Windows Server and desktop environments for 200+ endpoints; managed Active Directory, OS imaging, patch deployment, server service configuration and backup support.

KEY ACHIEVEMENTS

- 40 to 60% reduction in server administration effort through PowerShell automation (Oracle)
- Zero outages across 8 Windows Server upgrade cycles (Wipro → Oracle)
- 25% reduction in escalation volume through standardized RCA playbooks (Oracle)
- 35% faster server logon times for 2,000+ users through VDI configuration optimization (Microland)
- 50% reduction in infrastructure disruptions through structured change management (Wipro Infotech)
- 98%+ SLA achievement sustained over 3 years of on-call support (Oracle)
